Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 recites the limitation "said shoulders". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 9-10 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Pat. No. 6,035,468 to Lee.

Claim 1, Lee discloses a folding bed comprising: a central dolly 6; two side parts 2 pivotally connected to said central dolly at opposite sides thereof and pivotable between a horizontal position, in an unfolded or open condition of the bed, and an upright position in a folded or closed condition of the bed; and means 16 associated with said dolly and said side parts for defining a bed plane in open condition of the bed, wherein said dolly is associated with box members 13 removably mounted on top of the dolly and provided with seats for the pivotal connection of the side parts of the folding bed.

Claim 2, wherein said box members are snap coupled on top of the dolly (col. 3 lines 54-57).

Claim 9, wherein the means for defining a bed plane are removably connected with the box members and with frames of said side parts.

Claim 10, wherein the side parts of the bed are removably coupled with said box members (col. 3 lines 46-54).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 6,035,468 to Lee in view of U.S. Pat. No. 5,216,769 to Eakin.

With regards to claims 3-4, Lee discloses all of the Applicant's claimed limitations except for the box members made from resiliently yielding plastic material. Eakin discloses a bed frame alternatively constructed from a resiliently yielding plastic material (col. 8 lines 45-49). It would have been obvious to one having ordinary skill in the art at the time of the invention to have the bed frame including the box members of Lee constructed from a plastic material as taught by Eakin in order to provide an alternative bed frame construction. With regards to the box members being molded it is well known that plastic materials are inherently molded during construction thereof.

Art Unit: 3673

Allowable Subject Matter

Claims 11-12 are allowed.

Claims 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
